Node	PHP
Javascript	React
Vue	Angular
Ruby on Rails	Django
Java(Spring)	CodeIgniter
Laravel	Mysql
Postgres	Mongodb

Cover Letter

I am writing to you in reference to the job posting you have made.

I believe I would be an excellent fit for this position since I am a software engineer with a wide variety of experience in the field.

I tend to view myself as a generalist since I try not to focus on any given technology.

My skills range from PHP(CI, Laravel), Node, React, Vue, Angular, Ruby On Rails, Java, Swift, React-Native, Flutter, Django to Mysql, Postgres, MongoDB,
and I have 8 years of experience.

For 3 years I focused on the Blockchain skill such as Solidity and Solana. Especially, I have good experience in Solana.

As a software engineer, I'm familiar with GitHub, GitLab, etc for version control and Jira and Trello for tasks management.

Also, I'm familiar with several kinds of testing systems.

I have been exposed to a wide variety of technologies in my career and consider myself to be very adaptable.

Because of my breadth of experience, I believe that I would make an excellent addition to your team.

Sincerely

Education

Bachelor's degree in Computer Science

Tsinghua University | May 2007 - Jun 2010

Bachelor's degree in Computer Science

Tsinghua University | May 2007 - Jun 2010

WHAT I'M PROUD OF

My Courage

To always leave my comfort zone. I'm not afraid to do whatever I need to do to achieve my goals!

My Competitive Effort

I can't stand to be behind of someone and like to be in front of him.

My Focus & Persistence

Despite any hard situation, I keep my focus on my goals and always move towards them

Keeping Good Relationship

I like to be a right-hand man regarding all the aspects.
